1)
Tad jogged 19 miles last week and
25 miles the week before.
How many miles did he jog?

2)
Tim walked 29 miles in May and
34 miles in June.
How many miles did he walk?

1)
2008 people came to the circus the first night. 1998 people came the second night.
How many people saw the circus in those two nights?

2)
Pete put 2453 peanuts in bags. Later, he put 1787 more peanuts in bags.
Altogether, how many peanuts did he put in bags?

Addition 1 Answer Key

Each row of answers corresponds to each row of problems and is read left to right.

	1) 4,006		2) 4,240		

Performance Objective Correlations:

- Add four-digit whole numbers
- Add three-digit whole numbers
- Add two-digit whole numbers
- Add whole numbers (with and without regrouping)
- Apply math to real-life situations
- Apply mathematical operations to everyday situations
- Demonstrate proficiency with basic addition facts
- Solve problems using the appropriate operations
- Solve word problems
